OBJECTIVE

To work as a Front-End Developer, applying professional experience in React.js, TypeScript, and JavaScript in the development of interfaces and web platforms, with Clean Code best practices and strategic use of AI tools in the development workflow.

EDUCATION

Associate Degree in Systems Analysis and Development

Anhanguera College of São Bernardo — March/2022 – June/2024

LANGUAGES

English: Advanced | Spanish: Basic

EXPERIENCE

Front-End Developer | Moove Hub Technology / Technology and Investment Holding

January/2025 – October/2025

- Developed the official Osten Moove website (former name of Moove Hub startup) using React
- Built a corporate communication platform in React, with reusable components and real-time API integration via Axios, applying Clean Code principles
- Developed a mentoring platform focused on UX, security, and scalability, using JavaScript/TypeScript
- Participated in agile ceremonies (daily standups) and code reviews with the team
- Improved a digital signature platform with a focus on blockchain

Software Developer (PHP) | Education One

March/2026 – July/2026

- Maintained and evolved an educational management system used by multiple schools
- Diagnosed and fixed bugs and inconsistencies in a production system
- Implemented critical PDO transactions, ensuring batch data integrity
- Created and optimized SQL queries (HeidiSQL) for data validation and integrity
- Triaged and prioritized tickets via Jira, assigning demands in a Kanban flow
- Configured CI/CD pipelines with GitHub Actions

IT Support Intern | Subprefeitura do Ipiranga (Ipiranga District Office)

June/2023 – June/2024

- Provided technical support, troubleshooting, and problem resolution
- Installed and configured operating systems

SOFT SKILLS

- Technical communication with cross-functional teams
- Collaboration in agile environments, with participation in Scrum (daily standups) and Kanban
- Strategic use of AI tools (Claude, GPT-4, Gemini) in the development workflow

SKILLS

React.js, TypeScript, JavaScript, React Router, Redux, React Query, Axios, HTML5, CSS3, Tailwind CSS, Styled Components, React Hook Form, Vite

Node.js, Express, SQL, MySQL, REST APIs, WebSocket, PHP

Docker, Linux (Ubuntu)

Git, GitHub, GitHub Actions, Azure DevOps, Jira

ADDITIONAL INFORMATION

Projects:

PDF Machine: Full-stack DOCX → PDF converter, React, TypeScript, Node.js/Express, containerized with Docker (custom Dockerfile, LibreOffice integration)

GitHub: <https://github.com/patrilucas59/conversor-docx-pdf>

NoteMe: Task Manager: React, JavaScript, Tailwind CSS, React Router

GitHub: <https://github.com/patrilucas59/gerenciador-de-tarefas>

Foco+: Study Dashboard: Angular, TypeScript, Tailwind CSS

GitHub: <https://github.com/patrilucas59/dashboard-estudos>

ADDITIONAL EDUCATION

Career Track: Front-End Development with React (Alura Courses): **In progress**

Comprehensive training covering TypeScript, application architecture, and performance
